

Dear Brandon

On behalf of the Homecare team, we want to congratulate you with the purchase of your new property!

This mail may be unexpected...

We want to tell you about a unique partnership between the Homecare Foundation and Loraine van Antwerpen.

The Homecare Foundation is busy with an important project to assist bedridden patients who needs frail care support. The Foundation will, within a few months, provide financial assistance to caretakers, in order for them to look after patients.

The current food price increases put considerable financial pressure on caretakers. Our country is facing huge challenges which impact the most vulnerable people as well. We cannot allow these people to struggle financially in order to pay for the bare necessities needed to help bedridden patients. We implement a business plan that will secure funding on an on-going basis. Our task to support bedridden patients is very important therefore we are not allowed to fail these patients.

This may sound confusing, but the only way to successfully support bedridden patients is not to feel sorry for them. It is in fact the opposite. We need to focus on how much life can and must be enjoyed!

The Foundation went into partnership with exceptional people... We invited one property company per area to become ambassadors who we can rely on to help bedridden people within Klerksdorp. Louise Snyders (the principal of Re/Max Exclusive Klerksdorp) immediately accepted our invitation. She had chosen the agents whom she believes will buy into the project to become ambassadors.

It is only agents with the correct personality and commitments that became ambassadors. These agents have to forfeit a portion of their commission to support caretakers financially. Something that not all agents are willing to do! You will therefore understand just how much the Homecare Board values Loraine van Antwerpen!

The Foundation is currently busy with a proses to establish the business network nationally in preparation for our launch of the Enjoy Life phone app. The phone app integrates with numerous companies that all can somehow contribute to a person's Enjoyable moments. The Foundation will even help the public to tick items on their bucket lists! Phone app users can list items they would love to do, and the Foundation will randomly select people and we will help them negotiate better rates, even allocate funding to help them. We make it possible to accomplish items people might never have been able to do.

The phone app is scheduled to be released early December 2017.

The partnership also involves the best restaurants, where the public will have access to exceptional restaurant offerings via the Enjoy Life app.

In Klerksdorp, we partnered with Peer's Place Restaurant. Peer van Zyl also joined the project to support patients in the Klerksdorp community.

There is a partnership between Re/Max Exclusive Klerksdorp and Peer's Place Restaurant. They share voucher structures to help fund the Homecare Foundation during our implementation period.

Loraine bought you a restaurant voucher that we now mail to you. All the companies involved, including the Homecare team will appreciate it if you use this voucher and treat yourself at Peer's Place Restaurant. Enjoy every moment...

On behalf of the Homecare Board, thank you for choosing Loraine and the Re/Max Exclusive Klerksdorp team as your property partners! You made it possible for Loraine to fulfill her part of being an ambassador.
