Hi Pieter,

we will sponsor 20 cappachinos month. We ask R14.00 per cappachino and cost is around R7.50. We will work on a month to month basis and see how it works. If there is demand for more, we can talk again.

Thank you,

JD van Niekerk.

Hello JD & Hazel

The Homecare Foundation invites your company into a partnership with numerous companies in other industries. As a group, with the help of cappuccinos, coffee and carwash vouchers, we can provide a support structure for bedridden patients and their caretakers.

Four years of preparation work and software development is now finalized to take on one of the biggest tasks in the frail care environment. We now invite a small number of fuel station companies.

You will read about an action plan with 6 focus points to increase income for fuel stations, that we as an NPO organization implements, which petroleum companies **cannot**. Most companies work to earn income for shareholders. We do not have shareholders, our beneficiaries are bedridden patients and they **need** funds. With this in mind, you should understand why we cannot fail the companies we partner with.

Companies or people can only donate to help others if they personally have extra funds. We will fail the patients in the long run if we cannot increase income for our business partners. We work hard and **smart** to **earn** donations from **other** companies. We provide exceptional marketing strategies to help all our business partners.

Our business plan to support bedridden patients in your community consist of a unique partnership between a small percentage accommodation companies, a fuel station, a fitment centre, a restaurant or coffee shop and one property company. The small group of companies forms the core of our support strategy for patients in your area.

We implement a practical support plan, where we negotiate cappuccino or carwash vouchers from our fuel station partner. (We do not ask for cash donations.) The Foundation will arrange that only High LSM Income clients of other companies support your business. The Foundation will ask these clients to please support with fuel purchases or other products you sell. You will immediately benefit as business partner. The Foundation will also buy vouchers from partners that will be used for our media campaigns.

We ask you to read the introduction for fuel stations on our website. We explain how we reward business partners more than 10 fold for donations.

We implement new business strategies backed with advanced software to help the patients. To help them, we first need to help our business partners increase income.

Please visit the following website:

On the homepage you will find a section "Business partners (New)"

You will open a page where we invite all the different industries. Please click on Fuel stations & Carwash link and use the following password to access the pages: Fuel4u2Care

You may ask, why will any NPO organization help one fuel station partner to secure more business? We explain the value of such a partnership and that the Foundation benefits hugely when working with a small number of fuel station companies... It will be interesting to read our strategies... it will make a difference, even in our harsh economy.

Thank you for your time.

Regards
