Dear Pieter

## AMBASSADOR INVITATION

It is privilege for **RE/MAX** Exclusive to join the Homecare Foundation in Klerksdorp. Your project in helping the frail, abused children and tourism is near and dear to our hearts.

You and your team are doing important work for our community and like you we are committed in giving back to our people.

It is not always possible to make financial contributions, and your request to use software that can generate funds for bedridden patients is a well - planned strategy.

Your commitment to help my team and I sell more properties is also something we appreciate! I have never heard about the NGO who can develop technology to help a property partner.

Your knowledge to help the principal is also something remarkable. I have never seen similar system reports and support services that you are currently offering us as principals. You are correct when saying that most IT companies develop software to support all agencies in certain area.

I can thus understand why your system can preferably only be offered to one or maximum two principals. It is a system that will help us to guide our agents into selling more properties.

It is a privilege to myself and **RE/MAX** that you have invited us.

We as **RE/MAX Exclusive** will definitely support the Homecare Foundation with pride.

Thank you and blessings!!!

Louise Snyders  
Broker/ Owner
